**To whom it may concern:**

Joey joined our **Accenture Internship Program** from 8 July 2019 till 14 Feb 2020. She was assigned to a multi-agency government project, which has been in operations for six years. During her internship, Joey played a key role in setting up automated testing for the existing system, writing test packages and conducting functional testing for a couple of enhancements in the project.

Her key assignments included the following:

1. Writing scripts for automated testing which will be complementary to the existing modules in system.
2. Identify, prepare test packages and execute testing scenarios (include regression testing) for changes for SIT and UAT Shakedown.
3. Prepare test data and assist users for UAT sessions.
4. Update functional specifications documents and training guides.
5. Perform any other tasks as assigned by the test leads.

During her time in the project, Joey had the responsibility to ensure that the assigned tasks were completed within the given timeline. She is also meticulous in everything she undertook. When in doubt, Joey would actively seek for clarifications. She was also able to communicate her ideas effectively and confidently.

When Joey was in the automated test team, she was assigned under one of the project members to learn how the project process work and understand existing automated scripts prepared by other members of the team. She was quick to pick up on the technical aspect and was able to complete the task assigned.

With a basic understanding of the system, Joey was then asked to help the test team to help in the functional testing. She had shown noteworthy writing skills for the test packages she has written. She has also demonstrated that she can adapt when she is given direction and is able to work with different team members. If she chooses to come back and join Accenture after her university, we would be very glad to work with her again. We have no doubt that her thoroughness and good attitude will bring her success in any endeavor she undertakes.

Yours Faithfully,

A handwritten signature in purple ink that reads "Sarah Li".
