LANGUAGES & FRAMEWORKS

TypeScript, JavaScript, Angular, React, C#, .NET Core, ASP.NET, Node.js, MySQL, MongoDB, GraphQL

TOOLS & PLATFORMS

Tailwind, Next.js, Storybook, Docker, Azure DevOps, AWS, Kafka, RabbitMQ, Selenium, SonarQube, Figma

EDUCATION

Singapore Institute of Technology

SEPT 2020 – OCT 2024

Bachelor of Engineering in Information & Communications Technology (Software Engineering) Honours with Merit

Temasek Polytechnic

APR 2017 – MAY 2020

Diploma in Information Technology

PROFESSIONAL EXPERIENCE

Software Engineer

SEPT 2024 - PRESENT

IP-TRIBE Pte Ltd, Singapore

- Owned 30% of full-stack module development using [Angular](#), [.NET](#), [GraphQL](#), [MongoDB](#), [TailwindCSS](#), [PrimeNG](#), [AG Grid](#), [RabbitMQ](#) and [Docker](#) - ensuring scalable architecture and secure data handling.
- Implemented real-time [WebSocket](#) to manage live events with idempotency and consistent state across all window sessions.
- Designed and iterated user-centric UI/UX wireframes using [Figma](#) and [Sketch](#), delivering intuitive and accessible interfaces to end users, public sector stakeholders, and vendor collaborators.
- Led requirement gathering sessions with users, clients, and vendors, translating business needs into maintainable, high-performance features.
- Boosted development efficiency by 20% through enforcing industry best practices, clean architecture, and solid design principles, reducing technical debt, improving collaboration, and training developers on scalable coding practices.

Apprenticeship, Application Developer

JAN 2023 – DEC 2023, MAY 2022 – AUG 2022

Accenture Pte Ltd, Singapore

- Managed and maintained a shared UI component library and [Microfrontend](#) architecture, resolving defects, refactoring legacy modules, and enhancing reusable components in Angular.
- Led [Angular](#) framework upgrades (v13 → v16), resolving deprecations, dependency conflicts, and configuration issues to ensure long-term framework stability.
- Enforced code quality standards through [SonarQube](#), maintaining more than 80% unit test coverage using [Jasmine](#) and [Karma](#) to reduce regression risk.
- Implemented and maintained [Storybook](#) for component-driven development, improving UI consistency and accelerating cross-team collaboration.
- Conducted [Lighthouse](#) and [WCAG](#) accessibility audits, strengthening compliance and usability.
- Performed security validation through tokenization and encryption testing using [Azure Key Vault \(AKV\)](#), while leveraging [Azure DevOps](#) for CI/CD debugging and pipeline monitoring.
- Executed [SQL](#) query and [Kafka](#) message testing across [Dockerized Microservices](#) to ensure reliable inter-service communication.
- Contributed to achieving a quarter-million-dollar public sector project milestone by strengthening system reliability and maintaining high engineering standards.

PROFESSIONAL EXPERIENCE

Apprenticeship, Backend Tester

MAY 2021 – AUGUST 2021

Accenture Pte Ltd, Singapore

- Constructed high-quality API and [C#](#) unit tests adhering to project coding standards, this results in an increase of at least 85% in code coverage for two notification services, ensuring software reliability.
- Maintained technical documents outlining REST API designs and facilitating knowledge transfer, resulting in a 10% improvement in training efficiency online.

Internship, Software Tester

JULY 2019 - FEBRUARY 2020

Accenture Pte Ltd, Singapore

- Designed test packages and data, supported UAT with clients, increasing satisfaction and sustaining a 6-year partnership.
- Increased code efficiency by 60% by developing automated test scripts using [Selenium](#) and [C#](#) for existing system modules.

PROJECT EXPERIENCE

Smart Agritech Supervisor (Grade A-)

MAY 2022 - AUG 2022

Associated with Singapore Institute of Technology and Archisen

- Co-developed a full-stack web application using [React](#) and [Flask](#), enabling users to upload lettuce crop images and monitor growth stages (week 0–3) via an interactive dashboard.
- Implemented computer vision and machine learning models ([CNN](#) and [Faster-RCNN](#) in [PyTorch/TensorFlow](#)) to detect growth stages and predict wilting, improving early intervention accuracy.
- Automated image collection using a [Raspberry Pi](#) with [Arduino](#) camera module and [Tailscale VPN](#), enabling scheduled photo capture and cloud upload, reducing manual effort and increasing operational efficiency by 70%.

INDUSTRY CERTIFICATIONS & AWARDS

NVIDIA-Certified Associate: AI Infrastructure and Operations Certification

FEB 2026 - FEB 2028

Singapore Computer Society Prize for Final Year Best Capstone Project in Software Engineering

OCT 2024

SCRUM.org: Professional Scrum Master I Certification

AUG 2022

ONLINE CERTIFICATIONS

MongoDB Aggregation Fundamentals Badge

FEB 2026 - FEB 2028

MongoDB Schema Design Patterns and Anti-patterns Skill Badge

AUG 2022

VMware Docker Fundamentals

OCT 2022

OTHER RELEVANT PARTICIPATIONS

PSA Code Sprint Hackathon, 2023

Participant

SIT Developers Club, 2021 – 2022

Head of Publicity

Google Developer Student Club, 2021 - 2022

Team Member

[SIT HackRift \(Hackathon\), 2022](#) 

Organiser

Meta Above and Beyond Computer Science (ABCS) Programme 2022 Cohort
